

## Heavy Duty Joints 40

### Application:

For connecting two profiles at any angle up to 180° ( $\pm 90^\circ$ ).  
The clamp lever facilitates easy positioning. For heavy duty joints without a clamp lever, the angle can be set by tightening the hexagon nuts.

**System:** 40 - Slot 8

**Type:** Joints

## General Data

| Designation   | Description                                | System      | Material      | Weight (g) |
|---------------|--------------------------------------------|-------------|---------------|------------|
| <b>RA1310</b> | Heavy Duty Joint 40 x 40, natural          | 40 - Slot 8 | GDZn, natural | 293        |
